PERSONAL PROJECTS

TIKTIK | [🌐](#) | [🔗](#)

- Tiktik is a video-sharing web application, where we can upload a video, like and comment on it
- The frontend is made using **Next JS, Typescript, and Material UI** for design.
- The backend is made using **Sanity**, and database is managed using sanity studio
- It also has user authentication using **Google Oath** and **JWT token**.

CHAT ME | [🔗](#)

- Chat me is a real time web application, where you can share feeling with your friends and family.
- The frontend is made using **React JS, Tailwind CSS** and **Material UI** for design.
- The backend is made using **Node JS, Express JS**, and the database is managed using **Mongo DB**
- It also has user authentication which is made using Rapid API with **bcryptJS** node module

EXPENSE TRACKER | [🌐](#) | [🔗](#)

- Expense Tracker is expense tracking web application, where we can keep a list of expense and income.
- It has a feature by which we can add expense or income by just using our voice, which is made using **Speechly**.
- The frontend of this is made using **React JS**, and **Tailwind CSS** for design.
- I also have added the chats which show the visuals of expense and income using **Chat JS**
